

## **APPROVED ROOF COLORS & STYLES**

It is the goal of your Palma Vista Board to keep a unified look in our community, which not only enhances aesthetic appeal but also fosters a sense of cohesion and identity among residents. The architectural roof style plays a crucial role in achieving this goal, particularly in our traditional Spanish Mediterranean community. The distinct characteristics of Spanish Mediterranean architecture, such as red barrel tile roofs and stucco exteriors, create a harmonious visual language that evokes historical roots. These architectural elements give a sense of warmth, elegance, and timelessness, contributing to the unique charm of our neighborhood. Furthermore, the traditional roof style has historical significance, as it traces its origins to the Mediterranean region and embodies centuries of architectural tradition. By embracing and preserving this architectural style we enhance the value while building a cohesive and visually striking community for generations to come.
